

DIPTYQUE UNVEILS ITS TRIBUTE TO THE ROVING HUMAN SPIRIT WITH A COLLECTION OF DECORATIVE OBJECTS TO ENSURE THE PERFECT SUMMER

Diptyque's latest summer collection is a close encounter between nature—that inexhaustible wellspring of inspiration and enlightenment—and our own living spaces as they endlessly evolve to the rhythm of summer.

In a collection dedicated to wanderlust, every element further stimulates the dialogue between the home interior and the great outdoors, opening a window wide open to the world of dreams and the imagination. These limited-edition decorative objects are an echo of the Maison's perfumed summer rendezvous, inspired by its fundamental principles: the poetry of flowers, the aesthetic Mediterranean palette, and travel in all its forms, be they real or dreamed.

The flower—vital to perfumers, essential in the herbarium of scents—becomes a precious object in this collection, to be taken everywhere and preserved as a memento. Freshly picked while strolling, then protected between the pages of the Flower Press—a practice much favored by the founders of Diptyque, whose travel journals were strewn with dried flowers that attested to countless wanderings. A flower is portable: it can be carried by hand or attached to the handlebars of a bicycle. Or slipped into the Stem Vase created in collaboration with Coco Brun by combining a sheath made of leather offcuts with a vase in borosilicate glass: a distinctive, unusual accessory to accompany you on your next adventure.

Flowers may also be gathered into a bouquet and placed in the wax Medicis Vase, a signature Diptyque object displaying an artisanal prowess inspired by vases from antiquity. For this limited edition, the Medicis Vase is available in Mediterranean blue—one of this summer's key colors, also found on both the Matchbox bearing our emblematic oval motif and on the iconic Coasted Candle Holder.

The latter object is inspired by the cherished collection of jars kept by one of the Maison’s founders and is hand-blown in a French glassblowers’ workshop. By candlelight, its seasonal hues fill the room with blue-tinted refractions of light. The small Candle Holder, with its crystalline finish, rounds off the coasted items in the collection. Its iconic contours reinterpreted by Studio Jean-Marc Gady to create a glorious setting for any of the Maison’s miniature candles. In both the large and small format, the hand-blown glass domes protect the candle flame, adding extra sparkle to the summertime table.

Outdoors, the Diptyque flame loses none of its radiance: its gentle glow remains the ideal accompaniment for summer evenings thanks to Travelling Lanterns consisting of a glass dome and a metal handle. Designed to hold a classic or medium-sized candle, this graceful object single-handedly enchants the atmosphere with the warm, intimate sensations. This summertime collection is completed by the black porcelain Candle Lid, topped with Diptyque’s inverted pyramid logo. When one of our extra large candles is extinguished, this indispensable accessory is the perfect way to protect the wax and preserve the scent. Hand-crafted by Manufacture de Couleuvre with all their exceptional expertise in the art of porcelain-making, it adds the finishing touch to a collection characterized by elegance and subtlety.

Delicate gifts to take wherever you go, even to the most far-flung corners of the globe. Special treasures to add enchantment to our everyday lives. This new collection of decorative objects holds out the promise of a truly memorable summer.

- Traveling stem vase — \$85
- Flower press — \$130
